# StoneLux®

THE LOOK, FEEL & QUALITY OF NATURAL STONE

## Garden Stone Coating

Garden Stone Coating is a water-based stone effect paint specially formulated for exterior use and ideal for rejuvenating your garden.

Give terracotta pots, wooden planters, garden ornaments, concrete, fence posts and foot boards a stone effect quickly and easily.

A cost effective alternative to natural stone.

## Quality for Less

Our high performance coating adds a stone effect to just about anything in your garden. Whether

you are transforming concrete garden ornaments to elegant stone features, or renewing your existing stonework, the finish will look stunning.

### Application

It is easy to improve the appearance of your home and garden in a few simple steps.

Our unique ground stone formulation provides an authentic and breathable stone finish that looks and feels like natural stone.

### Suitable Materials

- Wood & Wood Finishes
- Concrete
- Terracotta
- Existing Stone
- Old Paintwork
- Bricks
- Tiles
- Ceramics
- MDF
- More

## Benefits

### Authentic

Our unique and exclusive ground stone formulation gives you a truly authentic stone finish which looks and feels like natural stone.

### Durable

Gives a decorative, very hard-wearing and UV stable finish.

### Weather Resistant

Provides a weatherproof finish which resists water and mildew. A unique breathable yet non-porous formulation.

### Quick

Quick drying and easy to apply using either a brush, roller or spray. Simply use straight from the tin.

### Cost Effective

A cost effective alternative to natural stone surround. All the benefits of stone without the cost.

### Environmentally Friendly

Environmentally friendly. Waterbased. Low VOC, virtually odourless. Simply clean brushes with water.

## Buy Now

All products are available to purchase online at [www.charlesproducts.co.uk](http://www.charlesproducts.co.uk) or by calling us direct on 01405 720281.

## Easy to Use

### Preparation

- To achieve a professional stone effect finish, prepare all surfaces well.
- Ensure surface is clean, sound and dry. Repair any damage with a suitable filler.
- Sand pre-painted or lacquered surfaces to provide a key.

### Brush/Roller Application

- Apply Primer allowing 1 - 3 hours to dry depending on conditions.
- Apply Stone Coating in multiple thin coats, do not try to cover in one application. Allow each coat to dry before applying the next.

### Tips!

- Circulate warm air around the painted surface to decrease drying times.
- If you catch or scuff the drying coating, simply brush over using a damp soft bristle brush.
- Apply in multiple thin coats, building the stone effect layer by layer for a professional uniform finish.
