Benefits

Authentic

Our unique and exclusive ground stone formulation gives you a truly authentic stone finish which looks and feels like natural stone.

Durable

Gives a decorative, hard-wearing and fire resistant, stone effect finish.

Quick

Quick drying and easy to apply using either a brush, roller or spray. Simply use straight from the tin.

Cost Effective

A cost effective alternative to new stone features. All the benefits of new stone features without the cost or mess.

Environmentally Friendly

Environmentally friendly. Waterbased. Low VOC, virtually odourless. Simply cleans brushes with water.

Easy to Use

Preparation

- To achieve a professional stone effect finish, prepare all surfaces well.
- Ensure surface is clean, sound and dry. Repair any damage with a suitable filler.
- Sand pre-painted, lacquered & marble surfaces to provide a key.

Brush/Roller Application

- Stir well before use.
- Apply Primer allowing 1 - 3 hours to dry depending on conditions.
- Apply Stone Coating using a natural soft bristled brush in multiple thin coats, do not try to cover in one application. Allow each coat to dry before applying the next.

Spray Application

- Stir well before use
- Apply in multiple thin coats, do not try to cover in one application. Ensure each coat is touch dry before applying the next.
- Textured Spray Gun - use a nozzle size between 2mm to 2.5mm.
- Gravity Fed Spray Gun - use a nozzle size between 1.8mm to 2.5mm.
- Various PSI settings can be used for light or heavy finishes (approx. 60 psi for a medium textured finish).
- If necessary stone coating can be diluted, using no more than 15% water.

Tips!

- Circulate warm air around the painted surface to decrease drying times.
- For a fine stone finish, lightly sand the finished surround with a medium grade sand paper (always wear an appropriate dust mask when sanding).
- If you catch or scuff the drying coating, simply brush over using a damp soft bristle brush.
